Computer Literature Index

A Subject/Author Index to Computer and Data Processing Literature

Contents

1. **Guide to Use** 3
   Provides a general introduction to the Index including a statement of editorial policy and instructions on the use of the Subject, Author, and Publisher Indexes.

2. **Glossary & Subject Guide** 7
   Provides brief descriptions of each of the subject headings, including all "See also" pointers. It is intended to provide additional guidance in locating subjects and to eliminate any ambiguities with respect to the choice of subject headings. This section is included only in the Annual Cumulation.

3. **Subject Index** 21
   The main section of the Index, the Subject Index contains the complete bibliographic entry, including the author, title, citation, and annotation, organized alphabetically by subject.

4. **Author Index** 259
   This secondary index provides a cross-reference by author's last name with pointers to the subject classification in which the full entry is listed.

5. **Publisher Index** 349
   Contains a listing of publishers of both books and periodicals, with identification of the abbreviations used in the Subject Index, full publication name, address, and the specific issues covered in this edition of the Index.

1994 Cumulation
Covering the period
January 1994 - December 1994
